

April greens report.

This month all greens have been cored, seeded and dressed. They will be dressed again in approximately two weeks.

The new pond liner has now been put into place and hydrovars installed.

The bottom pond has been cleared of silt.

All fairways have been sprayed with weed killer and iron.

The greens staff have started to edge bunkers and will top them up with sand if necessary.

All bare areas around the course have been scarred and seeded.

Further works to be done over the coming weeks.

All tees to be sprayed with weed killer. Pathways to be topped off with gravel.

New foot valve to be fitted on Monday and the watering system pressurised.

New 150m marker posts will go out

Hopefully now that we have had a decent amount of rain and the forecast for the coming Easter week is for warm temperatures we should start to see some growth on the course.

Dale Wilson.
